

## Pickle Rigger Tip-Up Line Keeper Instructions

Video: <https://picklerigger.com/setup-instructions/>

The Pickle Rigger tip-up comes with a line keeper kit that allows for attaching a line keeper to the handle of your fishing pole. This is necessary to ensure that loose line does not come off the spool and get entangled in the unit and interfere with the functionality of the tip-up. Below is a diagram that shows what comes with the kit.

### Pickle Rigger Line Keeper Kit

The diagrams below show the 4 configurations that the Line Keeper can be attached utilizing the 3 mounting assemblies of the line keeper. Note that it is important to try and achieve a 90-degree angle (or as close as possible) from the spool to the line keeper.
